Education:

We offer a diverse set of educational programs:

- Master’s degree - profile in Musicians’ wellness
- Variety of courses for credit
- Workshops
- Masterclasses with a health practitioner
Education:

We cover a wide range of topics:

- Basic anatomical and physiological concepts applied to musicians
- Analysis and prevention of musicians’ injuries
- Strategies for minimizing effects of performance anxiety
- Applying mindfulness to music performance
- Auditory health and hearing loss prevention
- Vision and music reading
- Available health approaches to improve musicians’ wellness
- Development of healthy habits and practice strategies
Research:

We aim to:

● Develop relevant, interdisciplinary research
● Expand theoretical and practical knowledge
● Evaluate the effect of various treatments and educational approaches
● Develop methodologies and tools for objectively measuring musicians’ wellness
● Improve treatments and methods of prevention
● Establish strong community partnerships
● Provide opportunities for students to participate and gain research experience
Areas of Research:

- Performance Anxiety
- Somatic Approaches and Clinical Treatments
- Biomechanics and Injury Prevention
- Auditory and Visual Wellness
Clinic:

Integrated model of care so that musicians can receive a variety of clinical treatments in a framework which is tailored to their specific needs:

- Assessment and care of physical pain and discomfort
- Interventions to help cope with performance anxiety
- Hearing and visual evaluations and guidance
- Assistance in developing healthy habits
