

**Conference on Teaching, Learning and Technologies, McGraw-Hill  
Ryerson, University of Ottawa**

**Visual and Broadband-Mediated Learning, with Special Emphasis on Music  
Education**

This session provides participants with in-depth insight into the next generation of distance-education and video-mediated learning. Case studies and video examples will demonstrate the state of the art in new pedagogy and technology, including broadband video conference and use of video. Examples include telementoring, distance teaching to remote communities, teacher professional development and project-based learning, with a special emphasis on music education. Participants will be encouraged to brainstorm around their interests and potential applications, and strategies for implementation will be discussed. This session will be of interest to educators and staff developers, in all fields, not just music.
